

Ref. 4030-I

24 Ports

1RU

Cat 6A / Cat 8

Plug & Play

DESCRIPTION

The KEYSTONE patch panel is a fully loaded patch panel designed for use in the Advance system. It includes the A1+ connector, specifically engineered to meet the demanding challenges of 10 Gb/s transmission. Available in a high-density 24-port, 1U configuration, with NEXT, FEXT, Insertion Loss and Return Loss performance guaranteed up to 625 MHz. Modular metal panel with front dust cover included — a flexible, high-density solution for data centers and telecommunications rooms.

4030-I

TECHNICAL SPECIFICATIONS
